02. Key features and advantages

03. Implementation

04. Role

## Introduction

Reference : hyesu\_mon(Instagram)

Reference : barbie\_by(Instagram)

Reference : sehi\_ie(Instagram)

The above pictures are photos taken with a Polaroid camera.

## Brief description

**POLKKU**

‘POLKKU’ that edit photos as if they were taken with a Polaroid camera.

## Key features and Advantages

You can use the app instead of decorating with stickers or pens. It is also easy to modify.

Instead of buying a Polaroid camera, you can have the same effect as a Polaroid picture.

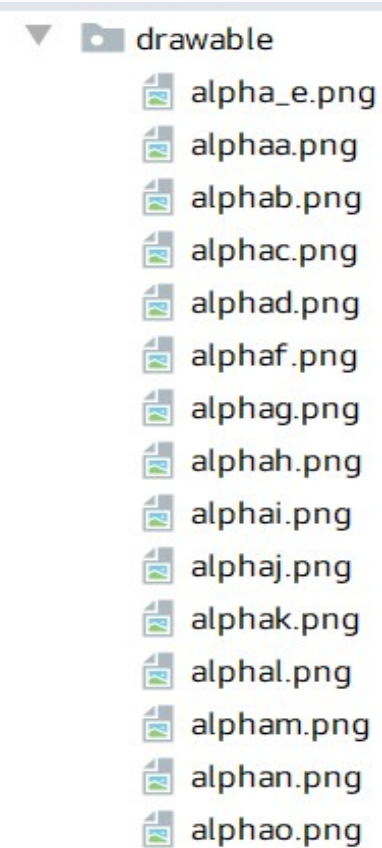

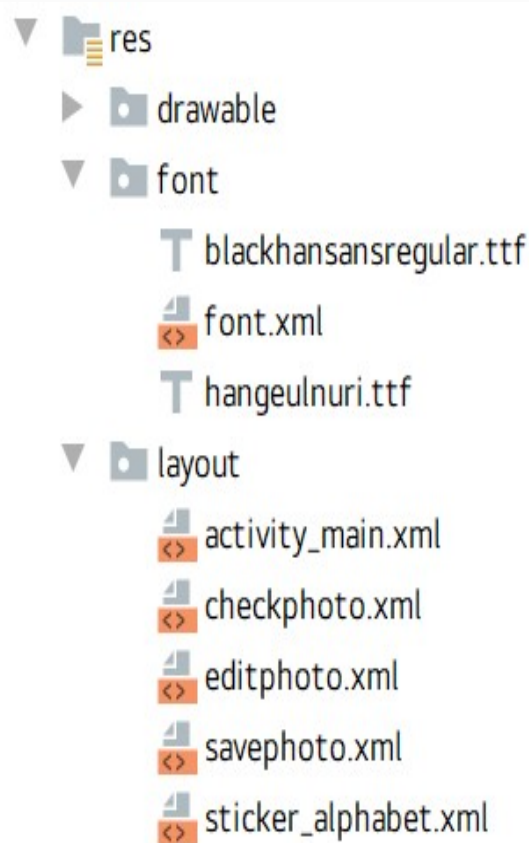

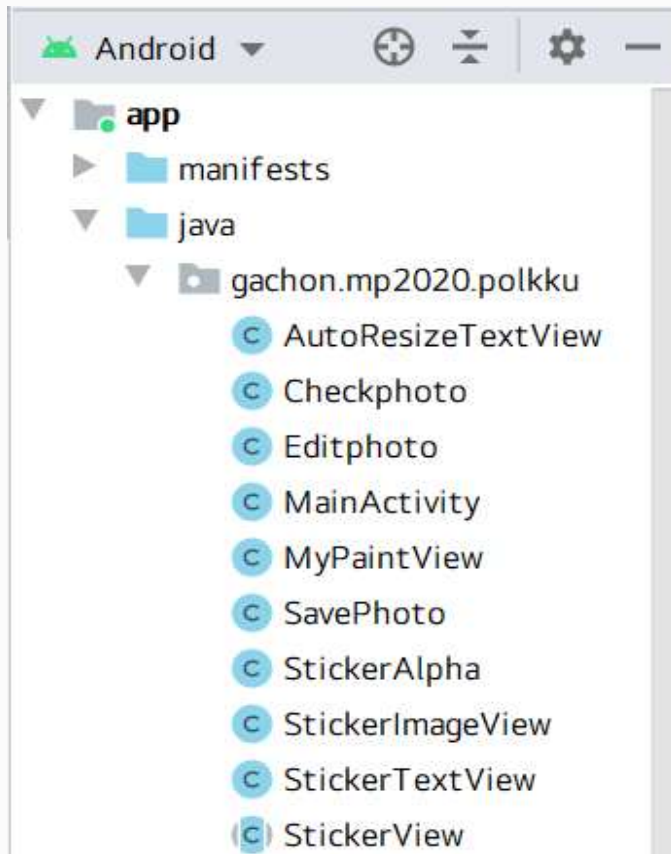

Pictures decorated as desired can be left as memories

## Demo Our App

# Implementation

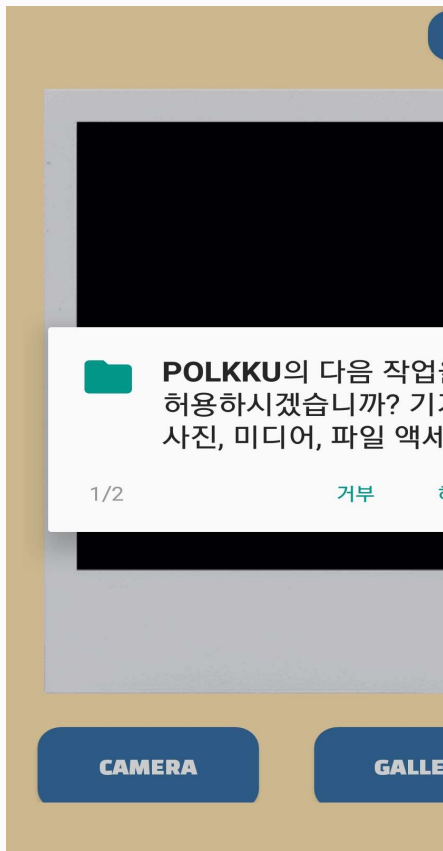

## CheckPhoto.class

```
public void openGallery(){
    Intent intent = new Intent();
    intent.setType("image/*");
    intent.setAction(Intent.ACTION_GET_CONTENT);

    startActivityForResult(intent, 101);
}

public void openCamera(){
    if(file == null){
        file = createFile();
    }
    imageUri = FileProvider.getUriForFile(this, "gachon.mp2020.polkku.fileprovider", file);
    Intent intent = new Intent(MediaStore.ACTION_IMAGE_CAPTURE);
    intent.putExtra(MediaStore.EXTRA_OUTPUT, imageUri);
    startActivityForResult(intent, REQUEST_CAMERA);
}
```

## CheckPhoto.class

### ► Rotational Angle Transformation

```
public int exifOrientationToDegrees(int exifOrientation)
{
    if(exifOrientation == ExifInterface.ROTATION_90)
    {
        return 90;
    }
    else if(exifOrientation == ExifInterface.ROTATION_180)
    {
        return 180;
    }
    else if(exifOrientation == ExifInterface.ROTATION_270)
    {
        return 270;
    }
    return 0;
}
```

텍스트를 입력하세요

```
byte[] byteArray = getIntent().getByteArrayExtra("image");
```

```
Bitmap bitmap = BitmapFactory.decodeByteArray(byteArray,0,byteArray.length);
```

```
BitmapDrawable ob = new BitmapDrawable(getResources(),bitmap);
```

```
final int width = (int) TypedValue.applyDimension(TypedValue.COMPLEX_UNIT_DIP, 312,  
getResources().getDisplayMetrics());
```

```
final int height = (int) TypedValue.applyDimension(TypedValue.COMPLEX_UNIT_DIP, 438,  
getResources().getDisplayMetrics());
```

```
linearLayout.setBackground(ob); // Place a drawable image in the background of layout
```

```
linearLayout.addView(view, params);
```

## EditPhoto.class

► Select Color that user want -> Open source

```
private void openColorPicker() {  
    AmbilWarnaDialog colorPicker = new AmbilWarnaDialog(this, tColor, new  
    AmbilWarnaDialog.OnAmbilWarnaListener() {  
        @Override  
        public void onCancel(AmbilWarnaDialog dialog) {  
        }  
        @Override  
        public void onOk(AmbilWarnaDialog dialog, int color) {  
            view.setColor(color);  
        }  
    });  
    colorPicker.show();  
}
```

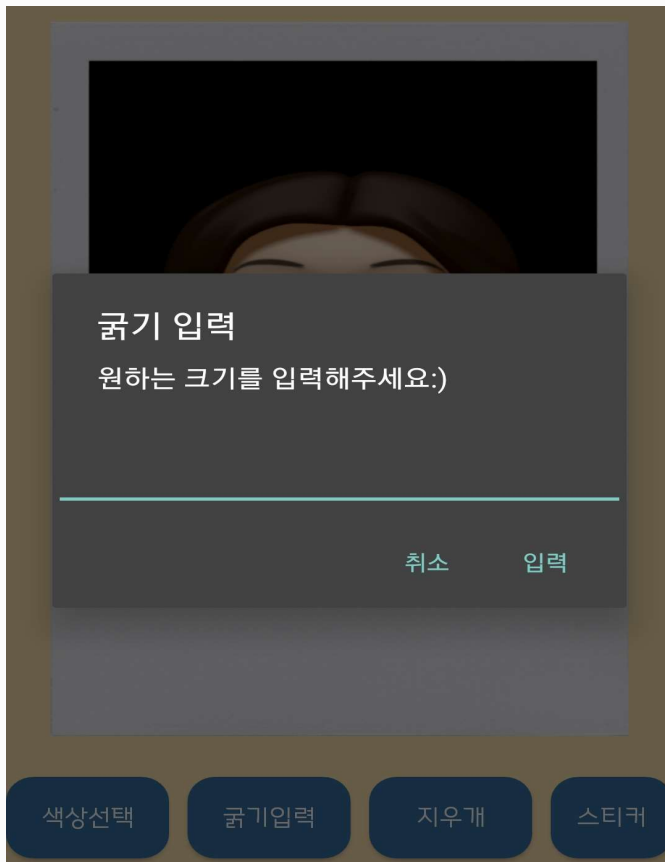

implementation 'com.github.yukuku:ambilwarna:2.0.1'

## EditPhoto.class

► Select width that user want

```
Button btn2=findViewById(R.id.thickPickerButton);  
btn2.setOnClickListener(new View.OnClickListener() {  
    @Override  
    public void onClick(View v) {  
        show();  
    }  
}); //굵기 선택
```

```
public void setStrokeWidth(int width){  
    mPaint.setStrokeWidth(width);  
}
```

## EditPhoto.class

```
btn1 = (ImageButton)findViewById(R.id.A);
btn1.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
        Intent intent = new Intent();
        intent.putExtra("selected", 1);
        setResult(RESULT_OK, intent);
        finish();
    }
});
```

```
@Override
protected void onActivityResult(int requestCode, int resultCode, Intent data) {
    super.onActivityResult(requestCode, resultCode, data);
    if(requestCode == REQUEST_IMAGE_STICKER) {
        if(resultCode == RESULT_OK) {
            int selected = -1;
            if(data != null) {
                selected = data.getIntExtra("selected", -1);
            }
            if (selected == 1) {
                StickerView im_sticker = new StickerView();
                im_sticker.setImageDrawable(getResources().getDrawable(R.drawable.sticker));
                linearLayout.addView(im_sticker);
                stickers.add(im_sticker);
            }
        }
    }
}
```

## EditPhoto.class

@Override

```
public View getMainView() {  
    if(tv_main != null)  
        return tv_main;  
}
```

```
tv_main = new AutoResizeTextView(getContext());  
//tv_main.setTextSize(22);
```

```
tv_main.setTextColor(Color.WHITE);
```

```
tv_main.setGravity(Gravity.CENTER);
```

```
tv_main.setTextSize(400);
```

```
tv_main.setShadowLayer(4, 0, 0, Color.BLACK);
```

```
tv_main.setMaxLines(1);
```

```
FrameLayout.LayoutParams params = new FrameLayout.LayoutParams(  
    ViewGroup.LayoutParams.MATCH_PARENT,  
    ViewGroup.LayoutParams.MATCH_PARENT  
);
```

```
params.gravity = Gravity.CENTER;
```

```
tv_main.setLayoutParams(params);
```

```
if(getImageViewFlip() != null)
```

```
    getImageViewFlip().setVisibility(View.GONE);
```

```
return tv_main; }
```

## SavePhoto.class

## ROLE
